EDUCATION

University of Minnesota, College of Science and Engineering

Bachelor of Science, Computer Science and Mathematics, Minor in Statistics

GPA: 4.0, Dean's List

Minneapolis, MN

Expected May, 2028

SKILLS

Programming Languages: Python, Java, JavaScript, TypeScript, Go, HTML5, CSS, SQL, Bash

DevOps & Tools: Docker, Linux, Kubernetes (K8s), Git, GitHub Actions, CI/CD Pipelines, REST APIs

Cloud & Database: Google Cloud Platform (GCP), KServe, MongoDB

RELEVANT EXPERIENCE

FPT Software

Hanoi, Vietnam

Intern

May 2025 - August 2025

- Built and automated CI/CD pipelines with GitHub Actions and Docker, reducing deployment time by 40% and ensuring faster release cycles across 3 internal environments.
- Developed an AI-integrated company research web application using React, Node.js, MongoDB, and Python, reducing manual lookup time by 60% for internal research workflows.
- Collaborated in a fast-paced engineering environment across development, testing, and deployment tasks, gaining hands-on experience with production-oriented software delivery.

PROJECT EXPERIENCE

Lay-Off-Link: End-to-End MLOps & Data Platform, Independent Project

April 2026 - Present

- Designed and deployed a production-style end-to-end MLOps platform across 3 services using Docker Compose, Kubernetes, and Helm.
- Built a CI/CD pipeline with GitHub Actions (7 jobs), including linting, 65+ tests, 80% coverage enforcement, Docker builds (5 images), Trivy security scanning, and k6 performance testing.
- Provisioned infrastructure using Terraform and Kubernetes with auto-scaling (2–10 pods), 3-replica deployments, and persistent storage (5Gi).

Personal Cognitive Load & Focus Monitoring System, Independent Project

March 2026 - Present

- Built an MLOps-oriented FastAPI service for cognitive load prediction with 3 core API endpoints, structured for containerized deployment and automated testing.
- Designed a GitHub Actions CI/CD workflow that runs automated tests, generates coverage reports, and enforces an 80% coverage threshold before downstream build stages.
- Developed 15 Pytest API test cases and reproducible sample-data generation for 200 records, improving service reliability and supporting the ML workflow.

TalentBridge, Hackathon Project

February 2026

- Built an AI-powered CV-job matching platform using FastAPI, LangChain, and ChromaDB, automating resume parsing, job matching, and candidate insight generation.
- Developed backend APIs and semantic search over 3,237 job listings using vector embeddings to return the top 5 matched roles based on candidate skills and experience.

LEADERSHIP EXPERIENCE

Hanoi Amsterdam Football Teams

Hanoi, Vietnam

Captain

July 2022 - August 2023

- Organized and led practice sessions; mentored team members to improve gameplay strategies.
- Guided the team to multiple tournament medals including Top 8 in Hanoi Football Tournament
